Stu LaRose	FP&M CPD, <i>Interim University Architect</i>
Aaron Williams	FP&M CPLA
Terry Boehner	FP&M CPD

Campus Master Plan Update:

Wisconsin Statutes 13.48(1) requires all institutions to develop a long range facilities plan (Campus Master Plan). This contract will provide a 10-year update of the current Campus Master Plan for UW-Madison, which was last revised in 2005. The updated Campus Master Plan will provide direction for future building sites and/or building additions, recognize historic preservation considerations, preserve and enhance open space, mitigate environmental impacts, address transportation, circulation and parking issues, plan for utility upgrades to meet projected demand, and support University programs. The project is currently 84% complete and proceeding through City of Madison review approval process.

Laura Serebin	Flad

WIMR West Wedge Addition

Project Background:

This project designs and constructs two floors (21,131 ASF/32,400 GSF total) of new office and laboratory space above the existing single-story structure on the west side of the Wisconsin Institutes for Medical Research (WIMR) Building. The existing space contains the Surgical Pathology Department, constructed by the UW Hospital and Clinics (UWHC) and completed in summer of 2014. The proposed two additional west wedge floors will be used to meet the growing demand for offices and laboratories on the clinical west campus.
